Patented No. US 6,360,494 - Copyrighted 1999-2007

All current incarceration designs uniformly contain varying degrees of dangerous Structural Blind-Spot - ENVIRONMENTS OF OPPORTUNITY. The new and revolutionary **OmniView™** incarceration design features **DIRECT VISUAL OBSERVATION** via **ZERO STRUCTURAL BLIND-SPOTS** and uniquely meets the No.1.Purpose of the new Federal P. L. 108-79 Prison Rape Elimination Act (PREA) of 2003

"(1) establish a zero - tolerance standard for the incidence of prison rape in prisons in the United States".

The new DVD archived 100% Staff & Inmate Surveillance design renders the 8,700 U.S. prisons, detention centers, and jails functionally obsolete.

National Prison Rape Elimination Commission

Dear NPREC Members,

In your deliberations and recommended PREA Standards compilation please note the "DIRECT SUPERVISION" (*a misnomer as it relies on the accepted word meanings, instead of the design performance, as it is not direct and only allows intermittent supervision*) enjoys American Correctional Association (ACA) Standards endorsement.

While the thirty-two year old 3rd Generation "DIRECT SUPERVISION" design was light years ahead of both Generations 1st Linear and 2nd Remote Surveillance — it's efficacy can not meet the zero-tolerance for prison rape requirement of PREA due to:

NATIONAL INSTITUTE OF CORRECTIONS MOSS GROUP, INC SUMMARY REPORT REGIONAL WORKSHOPS finding — Page 23, **Direct Supervision settings may, in fact, make it more difficult to prevent sexual assaults.**

"Most of the assaults (prison rapes) occurred between 6:00 a.m. and 6:00 p.m., during the day, in the cellblocks. And what is happening, we believe, is that because of all the activity that's going on, staff are easily distracted from what is going on in **individual cells** and **that's when the sexual assaults are occurring.**" (emphasis mine, cse) Doctor James Austin, sworn testimony at the NPREC hearing in Austin Texas March 26, 2007.

Enclosed please find a Comparison of 8,700 U.S. Incarceration Design Types with OmniView™ which introduces the 4th Generation of incarceration design called OmniView™. This Zero Structural Blind-Spot, DIRECT VISUAL OBSERVATION 100% Staff and Inmate Surveillance design meets PREA's Number one purpose of zero-tolerance for prison rape. I have sent each of you two separate DVD copies showing and proving the geometry, concept and solution to this monumental work you have shouldered.

Please allow the OmniView™ incarceration design to be permitted in your recommended PREA Standards.

Carl Sonny Emerson
